

ENSURING SAFE AND SECURED OPERATIONS.
BUILDING A BRIGHT FUTURE.

IXAR

FOUNDER
LATE SHRI. V. S. JAIN
(1940 – 2003)

EXPERIENCE... OUR EXPERTISE.

At IXAR, this is our belief.

This is our guiding philosophy.

This is what has earned our company
an enviable leadership position in the
NDT industry in India and abroad.

ABOUT US

Founded in 1969, Industrial X-Ray & Allied Radiographers (I) Pvt. Ltd., better known as IXAR had a humble beginning in the field of Radiography, one of the Non-Destructive Testing (NDT) methods. Soon after, we expanded our services with the inclusion of the complete range of NDT methods like Ultrasonic, Magnetic Particle, Liquid Penetrant, Eddy Current, Automated Ultrasonic Testing, Cross Country Pipelines and many others.

Driven by innovation, we have been consistently improving our service quality through technological advancements. In the year 1986, the company became a Private Limited Company. Since then, significant efforts have been made to diversify our service portfolio. We have always placed a strong emphasis on technological superiority to provide

services beyond compare. To this end, we have partnered with several technological world leaders. In the process, we acquired the ISO 9001:2000 Certification for meeting the highest quality standards in the year 2003.

As of today, IXAR stands tall as a leader in the field of Non-Destructive Testing methods across the country and in several overseas countries. Backed by our team of more than 1000 technicians, armed with state-of-the-art technologies, we efficiently meet the day-to-day challenges in the field of NDT. We are proud to acknowledge that there's not a single project of typical nature in India and abroad for which IXAR has not worked. It's the foundation of our confidence to undertake any challenging job, irrespective of size and technical complexities.

VISION AND MISSION

Our vision is to be the world's premier full-service Non-Destructive Testing Company with a clear focus on innovative technologies and customer satisfaction.

Our mission is to utilize cutting edge technologies in providing reliable, efficient and affordable Non-Destructive Testing services.

CUSTOMER DELIGHT

At IXAR, we strive hard to achieve complete customer satisfaction by providing reliable testing and inspection services. We Endeavour to achieve this while complying with the requirements of quality management systems. Our every service boasts of superior quality and reliability in a professional manner to exceed the customer's expectations.

OPERATIONAL EXCELLENCE

We truly understand our customers' ever-increasing demands for productivity, quality and safety. In the process, we train our personnel through regular training modules to improve our services. At IXAR, we believe it's a valuable approach to enhance our operational excellence.

TECHNOLOGIES AND APPLICATIONS

In this fast changing world, the need to be abreast with newer technologies is essential. At IXAR, we understand the importance of new developing technologies and leverage on them to provide our customers superior quality and reliable services. On a timely basis, we study innovative technologies for their effectiveness and utilise them for the benefit of our customers.

OUR SERVICES

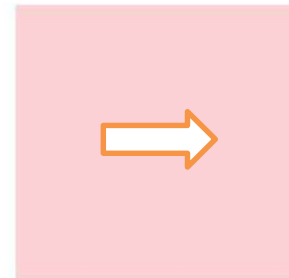

We offer a number of Non-Destructive, Destructive Testing & Engineering Services for various industries in India and across the globe through a team of well-trained and experienced professionals. Our services are available to a varied number of engineering sectors such as: Nuclear/Energy, Space and Aerospace, Petrochemical, Automotive, Construction, Transport, Defense and General Engineering. We are a member of several prestigious professional organisations such as, The American Society for Non-Destructive Testing, American Welding Society (ASNT), American Society for Testing and Materials, NACE, ISNT and NANSO.

NON-DESTRUCTIVE TESTING SERVICES

An eminent leader in Non-Destructive Testing Services, IXAR provides a comprehensive range of analysis techniques for product evaluation without causing any damage to the material. Our different methods of NDT are based on particular scientific principles. Our professionals are specially trained in identifying the appropriate method and technique depending on the specific nature of the project.

WE OFFER THE FOLLOWING NON-DESTRUCTIVE TESTING SERVICES

1. CROSS COUNTRY PIPELINE: In many a countries, pipelines stretching across millions of kilometers, which transport crude oil, gas, chemicals and water are the nervous system of numerous industries. IXAR brings you highly experienced NDT personnel, advanced equipment and accessories to keep these pipelines operating safely.

A. RADIOGRAPHY X-RAY CRAWLER:

Equipped with the world's-best X-Ray Crawler technology and experienced personnel, we offer you the advantages of high radiographic quality, high imaging sensitivity, low failure rate and high work efficiency. Our experts have perfected this world-acclaimed technique owing to advanced technology and years of experience.

B. AUTOMATED ULTRASONIC TESTING:

At the present time, Automatic Ultrasonic Testing (AUT) has become the NDE industry standard examination method for girth weld inspection. IXAR ensures that you benefit from AUT system's superior analysis and computerised data management system. We undertake the most recent technologies in bringing you the AUT's advantages of greater safety, faster cycle time and accurate detection.

2. CONVENTIONAL RADIOGRAPHY: Over the years, we have acquired expertise in the field of Conventional Radiography. In this technique, we utilise various X-Ray machines and radioactive isotopes to record the internal defects. In the Conventional Radiography technique, we use the following gamma radiation sources for inspection: X-Ray • Iridium 192 • Selenium 75 • Cobalt 60 • Closed Proximity Radiation System • Real Time Radiography. As a committed service partner, we provide assistance through our fleet of 70 Mobile RT Units, which is available 24 x 7. Our technicians are qualified and certified to Level III & II in accordance with SNT-TC-1A and our stringent written practices.

A. DIGITIZATION OF FILM:

At IXAR, we understand your need to have a proper storage and easy accessibility in obtaining the films. That's why, we make the most of the latest technologies to meet your requirements. With KODAK LS75 and LS85 High-Resolution Laser Film Digitizer, we deliver high performance, image quality and reliability. In the process, our experts capture film images, which are later converted to high resolution digital images. All in all, it ensures high degree of precision, excellent density resolution and precision, and spatial resolution.

B. CLOSE PROXIMITY RADIOGRAPHY:

With a restricted area of radiation, Close Proximity Radiography significantly reduces the radiation risk and eliminates the need to evacuate the work area. So, the testing doesn't affect the production targets and daily work schedules. Apart from making the most of the latest technology and systems, our personnel utilize SELENIUM-75 radioactive isotopes to provide high quality radiographs.

3. ULTRASONIC TESTING: Through high frequency, highly directional sound waves, our specialists expertly measure material thickness, find hidden internal flaws & analyse material properties in metals, plastics, composites, ceramics, rubber, and glass. We have raised the benchmark in Ultrasonic Testing by bringing together state-of-the-art technologies, modern electronic components and various testing applications. Our Level III & Level II certified UT technicians work in accordance with the strict industry codes. We offer various techniques of Ultrasonic Testing:

A. PHASED ARRAY ULTRASONIC TESTING (PAUT):

Through a team of trained, skilled and experienced professionals, IXAR provides advanced Phased Array Ultrasonic Testing (PAUT) for flaw detection, sizing and imaging. It offers significant technical advantages for weld testing and plant monitoring over conventional ultrasonic as the phased array beams can be steered, scanned, swept and focused electronically from a fixed probe position.

B. TIME OF FLIGHT DIFFRACTION (TOFD):

Time of Flight Diffraction (TOFD) has proven to be the most accurate and effective NDT technique in determining the defect height. Through a fully computerized system, our experts provide a grade of accuracy never achieved by other ultrasonic techniques. The system provides scan, store and evaluate indications in terms of height, length and position.

C. MANUAL ULTRASONIC TESTING (MUT):

Manual Ultrasonic Testing is ideal for flaw detection/evaluation, dimensional measurements and material characterization. It uses high frequency sound energy to conduct examinations and make measurements. Our experts make sure this quick, non-intrusive and cost effective inspection is also reliable with advanced testing equipment like Einstein TFT – II, Krautkramer's and others.

4. LIQUID PENETRANT TESTING:

Liquid Penetrant Testing is best-suited to detect surface breaking defects in any non-porous material, metallic and non-metallic surfaces. Through this technique, our experts evaluate the condition and quality of a component. With a wide variety of penetrant materials and a custom-made fluorescent penetrant inspection system, we provide both field and lab testing, with high volume processing of many different parts with both fluorescent and visible penetrants.

5. MAGNETIC PARTICLE TESTING:

Our experts utilise Magnetic Particle Testing to detect surface and near surface flaws and defects. It is fast and relatively easy to apply, and surface preparation is not as critical as compared to other NDT methods. We offer both on-site and in-house services as per your requirement.

6. WIRE ROPE TESTING:

Our professionals test the condition and estimate the remaining service life of a wire rope through Wire Rope Testing. We start with monitoring the wire rope's production process, then determine the parameters by load tests in our workshops and extend to non-destructive testing of installed wire ropes.

7. VISUAL TESTING:

It's a technique to detect and examine a variety of surface flaws, such as corrosion, contamination, surface finish and surface discontinuities on joints. Our experts employ a wide variety of equipment, ranging from examination with the naked eye to the use of gauges, micrometres, callipers, rulers, magnifying devices, remote video equipment and surface conditioning equipment.

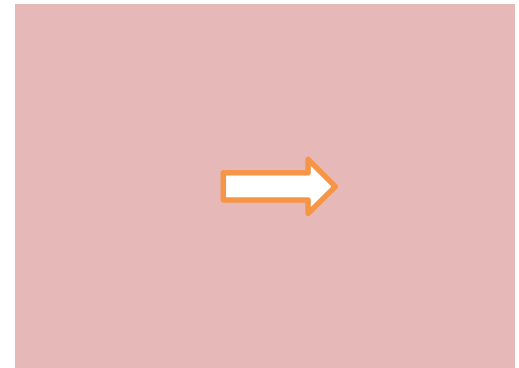

8. HELIUM LEAK TESTING:

At IXAR, we specialise in Helium Leak Testing, which is a very sensitive and quantifiable test. It is reliable and best-suited to be integrated into the manufacturing process. Our personnel ensure that this highly sensitive and technical method is robust and works efficiently as part of a production line.

DESTRUCTIVE TESTING SERVICES

Since 1999, IXAR has been offering Destructive Testing services with a core team of highly qualified engineers, metallurgists and analysts. Owing to our team's rich field experience, we are today recognized for professional integrity with concern for cost, quality and productivity. Also, we are approved by public sector undertakings and inspection agencies.

WE OFFER THE FOLLOWING DESTRUCTIVE TESTING SERVICES

1. MECHANICAL TESTING:

Through Mechanical Testing, our highly experienced engineers and technicians analyse whether a material or part is suitable for its intended mechanical applications by measuring tensile strength, bending, flattening, flaring, compression, hardness, cupping, in-situ hardness and impact (up to - 60 °C). We conduct the test as per ASTM, BS, IS, DIN, NACE or client specified standards.

2. INTERGRANULAR CORROSION TESTING:

Several methods exist for the testing of intergranular corrosion. At IXAR, our experts undertake the best-suited method for detecting susceptibility to intergranular attack. Every testing is carried out as per ASTM standard practices – A, B, C, D and E.

3. COATING TESTING:

Backed by a highly qualified team and state-of-the-art testing laboratory, we provide reliable Coating Testing services. We carry out tests on ferrous and non-ferrous metals, galvanizing, anodizing, chrome plating, nickel plating, paint coating, etc. Our equipment and machineries are certified by independent inspection agencies so that you can be always sure of reliable testing services.

4. CHEMICAL ANALYSIS:

Our experienced and expert chemists utilise numerous analytical tools and methodologies to provide a range of chemical analysis to analyse ferrous, non-ferrous metal, ferro alloys, coal, coke and refractory. We undertake strict measures and employ advanced instruments for every analysis.

5. FAILURE ANALYSIS: At IXAR, we conduct Failure Analysis services to identify the root cause of failure for casing, piping or any other component that has fractured, cracked or corroded. In the process, we utilise cutting edge technology and adhere to international standards. It helps in determining the cause of failure to prevent future occurrence, and/or to improve the performance of the device, component or structure.

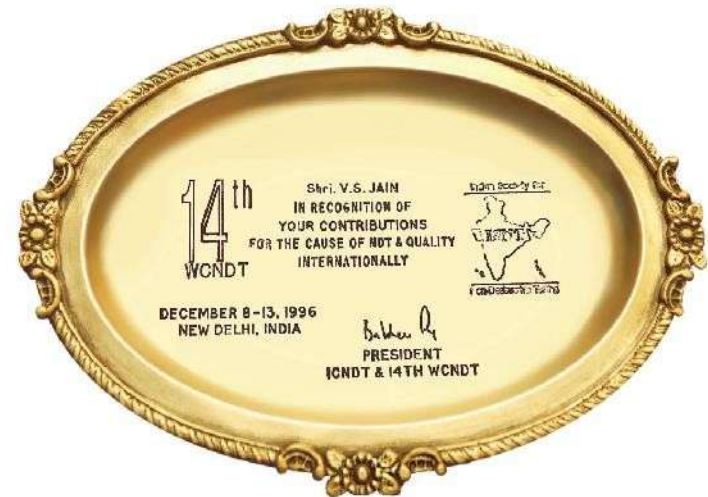

AWARDS AND RECOGNITIONS

IXAR has been internationally recognised for meeting environmental standard by achieving continuously improved environmental performance and compliance with legislation.

IXAR has been awarded for managing and negating occupational health and safety risks to employees and improving existing health and safety management systems.

IXAR has been recognised for its contributions for the cause of NDT and quality internationally at the **14th World Conference on Non-Destructive Testing (WCNDT)**

IXAR has been conferred the prestigious
Shri. R.G. Deshpande Memorial NAARRI Award – 1997
for playing a pioneering role in promoting NDT.

For the year 2008, IXAR won the
NDT ACHIEVEMENT AWARD
by ISNT (Indian Society for Non-Destructive Testing).

IXAR has won the
**NAARRI ENTREPRENEUR OF THE YEAR
AWARD - 2010,**
conferred by the National Association for Applications
of Radioisotopes and Radiation in Industry (NAARRI).
The award was felicitated by His Excellency
Governor Shri K. Sankaranarayanan

IXAR is one of the very few companies to be a
regular member of the International Pipeline &
Offshore Contractors Association (IPLOCA).

OUR EMPLOYEES

At IXAR, we strongly believe that our strength lies in our technicians. That's why, we attract and retain the most talented and experienced employees. We are committed to providing our employees a congenial work environment and great opportunities to grow in every aspect. Through timely training programmes, we hone their skills and enhance their capabilities. Our ASNT Level III personnel have a minimum of 7-25 years of experience and Level II personnel have 5-10 years of experience. Our senior team members have more than 25 years of experience.

With our branches spread across the world, we are proud to have a diverse workforce of more than 1000 employees. Through innovative thinking and effective management style, we are able to unite their experiences in offering world-class services to customers.

SUBSIDIARY COMPANIES

Over the past few years, we have emerged as a leader in the international arena and have been successfully engaged in numerous operations across the globe. Our partnership with some of the world's leading technological companies has made this possible.

OUR INDIAN SUBSIDIARIES:

X-RAY ACCESSORIES MFG. CO.

102, Faizan Apartment, 'A' Wing, S.V. Road, Jogeshwari (W), Mumbai 400102.
Contact: +91 022 26795906, 26791248 • Email: xamc@ixar.in

M.V. X-RAY EQUIPMENTS CO.

Plot No.6, Municipal Industrial Estate, Sainagar, Kandivali (W) Mumbai 400067.
Contact : +91 022 28086934, 55706934 • Email: mvxray@gmail.com

INSTITUTE OF QUALITY MANAGEMENT

CLIENTELE

Delivering top-of-the-line services in the areas of Non-Destructive Testing and Engineering Inspection, IXAR has earned the trust of numerous reputed companies in India and overseas.

PIPELINE JOB

• GAIL • MEKON LIMITED • ENGINEERS INDIA LIMITED • TRACTEBEL ENGINEERING • CORRTECH INTERNATIONAL PVT. LTD. • JAIHIND PROJECTS LIMITED • ESSAR PROJECTS • PUNJ LLOYD LTD. • KALPATARU POWER TRANSMISSION LTD. • LARSEN AND TOUBRO LIMITED • GAMMON INDIA LIMITED • KAZSTROY SERVICE INFRASTRUCTURE INDIA PVT. LTD. • HPCL • MITTAL ENERGY LIMITED • JSIW INFRASTRUCTURE PVT. LTD. • CAIRN ENERGY INDIA PVT. LTD. ... AND MANY OTHERS.

PLANT JOB

• G.R.ENGINEERING PRIVATE LTD. • SIEMENS LTD. • IOT ENGINEERING PROJECTS LTD. • GODREJ AND BOYCE MFG. CO. LTD • FAB-TECH WORKS AND CONSTRUCTIONS PRIVATE LTD. • PETRON ENGINEERING CONSTRUCTION LTD. • INDUS PROJECTS LTD. • CAIRN ENERGY INDIA PTY.LTD • LARSEN AND TOUBRO LTD. • ISGEC • SAMSUNG ENGINEERING CO.LTD • SHARP TANKS AND STRUCTURALS PVT. LTD. • ARTSON ENGINEERING LTD. • NTPC • BPCL • HPCL • IOCL • TATA • HINDUSTAN DORR OLIVER • INDIAN ORDNANCE FACTORIES • BARC ... AND MANY OTHERS.

TRAINING CENTRE

IXAR's Training Centre is one among the most affluent training centres that specialise in Non-Destructive Testing methods. Our trainers are the best qualified and experienced personnel in the industry (ASNT Level III, Radiological Safety Officers - BARC Scientific officers, etc). The institute has the distinction of catering to the professional requirements of engineers, supervisors and NDT operators.

UNMATCHED FACILITIES:

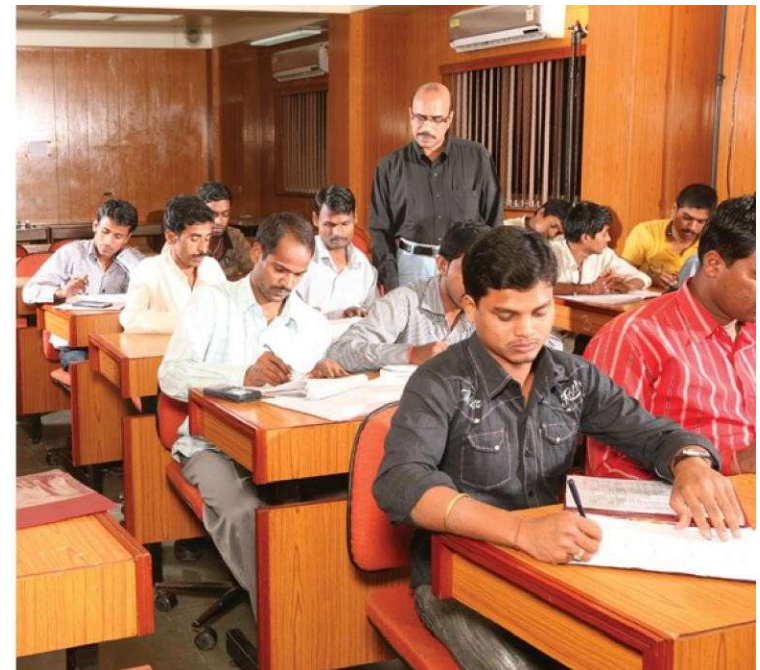

In addition to the specialised training, we offer a comfortable learning atmosphere through our air-conditioned lecture halls, audio visual displays and other conveniences. Our lecture hall has a convenient seating capacity of 40 candidates. At IXAR, we go a step further by offering a full-fledged training workshop for popular methods of Non-Destructive Testing.

COACHING INCLUDES:

- NDT laboratory for methods of RT, UT, MT, PT, PA & ET
- Real time radiography system
- Dark-room with manual and automatic processing system
- Underground radiography enclosure approved by AERB
- Sufficient equipment for RT, UT, MT, PT, PA & ET
- UT equipment of different makes - EEC, Krautkramer, Modsonic, Vibronics, Digital Thickness Meters
- RT-Tech/ops-Gamma cameras and X-ray machines
- MPT installed machine up to 3000A and portable units with prods, coils, yokes etc.
- Various test samples with simulated defects imported from M/s. Sonospection International Ltd., UK
- A library equipped with relevant books, codes of reference specs etc.
- Eddy current equipments-techno four insis ec-05, hockings phase cd-62
- Phased Array equipments - olympus omniscan, AGR TD-Focus

SERVICE RANGE:

ASNT Level I and Level II in the following NDT methods: • Radiography Testing (RT) • Ultrasonic Testing (UT) • Magnetic Partical Testing (MPT) • Liquid Penetrant Testing (LPT) • Eddy Current Testing (ET) • Phased Array Ultrasonic Testing (PAUT)

**THANK
YOU**

EXPERIENCE... OUR EXPERTISE.
